

Complete package from EUROIMMUN for detection of the new coronavirus and of antibodies against SARS-CoV-2

EURORealTime SARS-CoV-2 (for research use only)

- Developed for specific detection of SARS-CoV-2
- Quick and simple pathogen detection by means of reverse transcription and real-time PCR in one step
- High sensitivity due to simultaneous detection of two different SARS-CoV-2 target sequences
- Only one reaction per sample

Order number: MP 2606-0425

Anti-SARS-CoV-2 ELISA IgA and IgG

- CE marked test systems to aid diagnosis of COVID-19
- Sensitive and specific detection of antibodies against SARS-CoV-2
- Reliable differentiation of other pathogens infecting the respiratory tract
- Ideal supplement to direct pathogen detection
- Use for collection of epidemiological data

Order numbers: EI 2606-9601 A (IgA), EI 2606-9601 G (IgG)
